Remediate Datasheet

Reduce risk and protect your business with NCC Group's Remediate solution

With cyber-attacks increasing around 40% during 2020, organisations need to strengthen their security posture and proactively mitigate risk.

Security assessments, audits and lessons learned from a recent breach can all provide valuable insights into an organisation's risk profile. But translating these insights into a rapid and sustainable improvement plan can be a challenge. Skills gaps, capacity limitations and establishing a holistic view of exposure often hinder a company's progress.

NCC Group's Remediate solution helps you address these challenges by prioritising and resolving your security weaknesses at pace, rapidly reducing your cyber risk without disrupting business-as-usual operations.

Our experts will help you:

- Gain clarity on the key security challenges you face

- Prioritise critical vulnerabilities for rapid remediation

- Achieve measurable improvements to improve your risk

- Establish core foundations for securing your business long term

- Upskill your teams to take control of your ongoing cyber security

- Clearly demonstrate improvements to senior management

- Do it all without disrupting business-as-usual activity

1. Triage and prioritisation

We begin by examining your existing strategy, challenges and risk position. We will put recent security assessments into context and conduct additional discovery exercises where necessary. In doing so, we will review the three critical elements of technology, people and process and start to prioritise countermeasures based on your risk appetite, the value they offer, and the cost and scale of implementation.

2. Security improvement planning

We use the results from phase one to create a structured improvement plan to reduce your risk position over three possible time horizons. The first focuses on urgent challenges, rapidly putting in place fixes for your most dangerous vulnerabilities. The second recommends measures to enhance and secure your organisation over the mid-term. Finally, we explore more complex mitigation for protecting against cyber risk and longer-term strategic initiatives. This ensures you have a solid foundation for ongoing protection.

3. Implementation and improvement

In phase three, our cyber security experts will work with your team to implement the improvement plan adopting a modular approach. Urgent fixes for critical vulnerabilities can be expected in one to five days with longer-term risk mitigation planned against clearly defined improvement goals. Our scalable team means we can run multiple high-impact projects simultaneously, with each stage measured and validated so you can see the improvements we deliver.

Key benefits

Turning complex security reports into actionable programmes

You will get a systematic approach that turns complex vulnerability reports into clearly prioritised security improvement plans.

### Delivering hands-on remediation to address specific threats

Our expert team will deliver high-value programmes that clearly and rapidly demonstrate measurable improvements in your cyber risk capabilities, integrating seamlessly into business-as-usual activity.

Ensuring your team has the skills they need for long-term success

With NCC Group's Remediate, you'll gain access to a multi-disciplinary team of world-class security experts who will coach and train your team to protect your business and data.

How Remediate works

PROGRAMME GOVERNANCE			
TRIAGE	PRIORITISATION	PLANNING	IMPLEMENTATION & IMPROVEMENT
Pen test CSR Red Team Incident	Short, medium & long term activity	Clear, measurable milestones	Implement & fix (quick wins) Enhance & secure (medium term) Strategic programme (long term)

VALIDATION

Why NCC Group

- We are 100% focused on cyber security employing over 1,800 in-house security specialists who can scale at pace

- Our experts help protect over 14,000 companies worldwide across a wide range of industries

- We have deep understanding of how successful attacks occur, we infiltrate our clients' systems every single day

- NCC Group is a member of both CREST's Simulated Targeted Attack and Response (STAR) and the Bank of England's CBEST

- Remediate has already delivered results for organisations of all sizes, including global brands, local government, and non-profits and NGOs
